TECHNICAL MANUAL

**John Deere
Lawn & Grounds Care Division**

**TM1593 (May 95)
Replaces TM1429**

This technical manual is written for an experienced technician and contains sections that are specifically for this product. It is a part of a total product support program.

The manual is organized so that all the information on a particular system is kept together. The order of grouping is as follows:

- Table of Contents
- Specifications
- Component Location
- System Schematic
- Theory of Operation
- Troubleshooting Chart
- Diagnostics
- Tests & Adjustments
- Repair

Note: Depending on the particular section or system being covered, not all of the above groups may be used.

Each section will be identified with a symbol rather than a number. The groups and pages within a section will be consecutively numbered.

All information, illustrations and specifications in this manual are based on the latest information available at the time of publication. The right is reserved to make changes at any time without notice.

We appreciate your input on this manual. To help, there are postage paid post cards included at the back. If you find any errors or want to comment on the layout of the manual please fill out one of the cards and mail it back to us.

RECOGNIZE SAFETY INFORMATION

This is the safety-alert symbol. When you see this symbol on your machine or in this manual, be alert to the potential for personal injury.

Follow recommended precautions and safe servicing practices.

Understand Signal Words

A signal word—DANGER, WARNING, or CAUTION—is used with the safety-alert symbol. DANGER identifies the most serious hazards.

DANGER or WARNING safety signs are located near specific hazards. General precautions are listed on CAUTION safety signs. CAUTION also calls attention to safety messages in this manual.

REPLACE SAFETY SIGNS

TS201

Replace missing or damaged safety signs. See the machine operator's manual for correct safety sign placement.

HANDLE FLUIDS SAFELY-AVOID FIRES

Be Prepared For Emergencies

TS227

TS291

When you work around fuel, do not smoke or work near heaters or other fire hazards.

Store flammable fluids away from fire hazards. Do not incinerate or puncture pressurized containers.

Make sure machine is clean of trash, grease, and debris.

Do not store oily rags; they can ignite and burn spontaneously.

Be prepared if a fire starts.

Keep a first aid kit and fire extinguisher handy.

Keep emergency numbers for doctors, ambulance service, hospital, and fire department near your telephone.

USE CARE AROUND HIGH-PRESSURE FLUID LINES

Avoid High-pressure Fluids

Escaping fluid under pressure can penetrate the skin causing serious injury.

Avoid injury from escaping fluid under pressure by stopping the engine and relieving pressure in the system before disconnecting or connecting hydraulic or other lines. Tighten all connections before applying pressure.

Search for leaks with a piece of cardboard. Protect hands and body from high pressure fluids.

If an accident occurs, see a doctor immediately. Any fluid injected into the skin must be surgically removed within a few hours or gangrene may result. Doctors unfamiliar with this type of injury should reference a knowledgeable medical source. Such information is available from Deere & Company Medical Department in Moline, Illinois, U.S.A.

Avoid Heating Near Pressurized Fluid Lines

Flammable spray can be generated by heating near pressurized fluid lines, resulting in severe burns to yourself and bystanders. Do not heat by welding, soldering, or using a torch near pressurized fluid lines or other flammable materials. Pressurized lines can be accidentally cut when heat goes beyond the immediate flame area.

USE SAFE SERVICE PROCEDURES

Wear Protective Clothing

Wear close fitting clothing and safety equipment appropriate to the job.

Prolonged exposure to loud noise can cause impairment or loss of hearing. Wear a suitable hearing protective device such as earmuffs or earplugs to protect against objectionable or uncomfortable loud noises.

Operating equipment safely requires the full attention of the operator. Do not wear radio or music headphones while operating machine.

TS228

Service Machines Safely

Tie long hair behind your head. Do not wear a necktie, scarf, loose clothing, or necklace when you work near machine tools or moving parts. If these items were to get caught, severe injury could result.

Remove rings and other jewelry to prevent electrical shorts and entanglement in moving parts.

Use Proper Tools

Use tools appropriate to the work. Makeshift tools and procedures can create safety hazards. Use power tools only to loosen threaded parts and fasteners. For loosening and tightening hardware, use the correct size tools. **DO NOT** use U.S. measurement tools on metric fasteners. Avoid bodily injury caused by slipping wrenches. Use only service parts meeting John Deere specifications.

Park Machine Safely

TS230

Before working on the machine:

1. Lower all equipment to the ground.
2. Stop the engine and remove the key.
3. Disconnect the battery ground strap.
4. Hang a "DO NOT OPERATE" tag in operator station.

Support Machine Properly And Use Proper Lifting Equipment

TS229

If you must work on a lifted machine or attachment, securely support the machine or attachment.

Do not support the machine on cinder blocks, hollow tiles, or props that may crumble under continuous load. Do not work under a machine that is supported solely by a jack. Follow recommended procedures in this manual.

Lifting heavy components incorrectly can cause severe injury or machine damage. Follow recommended procedure for removal and installation of components in the manual.

Work In Clean Area

Before starting a job:

1. Clean work area and machine.
2. Make sure you have all necessary tools to do your job.
3. Have the right parts on hand.
4. Read all instructions thoroughly; do not attempt shortcuts.

Using High Pressure Washers

Directing pressurized water at electronic/electrical components or connectors, bearings, hydraulic seals, fuel injection pumps or other sensitive parts and components may cause product malfunctions. Reduce pressure and spray at a 45 to 90 degree angle.

Illuminate Work Area Safely

Illuminate your work area adequately but safely. Use a portable safety light for working inside or under the machine. Make sure the bulb is enclosed by a wire cage. The hot filament of an accidentally broken bulb can ignite spilled fuel or oil.

Work In Ventilated Area

Engine exhaust fumes can cause sickness or death. If it is necessary to run an engine in an enclosed area, remove the exhaust fumes from the area with an exhaust pipe extension.

If you do not have an exhaust pipe extension, open the doors and get outside air into the area.

Remove Paint Before Welding Or Heating

Avoid potentially toxic fumes and dust. Hazardous fumes can be generated when paint is heated by welding, soldering, or using a torch. Do all work outside or in a well ventilated area. Dispose of paint and solvent properly. Remove paint before welding or heating: If you sand or grind paint, avoid breathing the dust. Wear an approved respirator. If you use solvent or paint stripper, remove stripper with soap and water before welding. Remove solvent or paint stripper containers and other flammable material from area. Allow fumes to disperse at least 15 minutes before welding or heating.

AVOID INJURY FROM ROTATING BLADES, AUGERS AND PTO SHAFTS

Keep hands and feet away while machine is running. Shut off power to service, lubricate or remove mower blades, augers or PTO shafts.

HANDLE CHEMICAL PRODUCTS SAFELY

Direct exposure to hazardous chemicals can cause serious injury. Potentially hazardous chemicals used with John Deere equipment include such items as lubricants, coolants, paints, and adhesives.

A Material Safety Data Sheet (MSDS) provides specific details on chemical products: physical and health hazards, safety procedures, and emergency response techniques. Check the MSDS before you start any job using a hazardous chemical. That way you will know exactly what the risks are and how to do the job safely. Then follow procedures and recommended equipment.

Dispose of Waste Properly

Improperly disposing of waste can threaten the environment and ecology. Potentially harmful waste used with John Deere equipment include such items as oil, fuel, coolant, brake fluid, filters, and batteries. Use leakproof containers when draining fluids. Do not use food or beverage containers that may mislead someone into drinking from them. Do not pour waste onto the ground, down a drain, or into any water source. Inquire on the proper way to recycle or dispose of waste from your local environmental or recycling center, or from your John Deere dealer.

LIVE WITH SAFETY

Before returning machine to customer, make sure machine is functioning properly, especially the safety systems. Install all guards and shields.

LOADERS

CAPACITY—44 Loader, 316, 318, 330, 420 and 430 Tractor

	316, 318 & 330	420 & 430
Lift Capacity	180 kg (400 lb.)	225 kg (500 lb.)
Rated Breakout Capacity	260 kg (575 lb.)	328 kg (725 lb.)
1220 mm (48 in.) Bucket	0.164 m ³ (5.80 ft. ³)	
1370 mm (54 in.) Bucket	0.185 m ³ (6.54 ft. ³)	

CAPACITY—40 Loader, 415, 425, 445 and 455 Tractor (Two-Wheel Steer)

Lift Capacity at Full Height98 kg (215 lb.)
at 900 mm (36 in.)159 kg (350 lb.)
Breakout (Boom)226 kg (500 lb.)
Breakout (Bucket)272 kg (600 lb.)

CAPACITY—60 Loader, 650, and 655 Tractor

Lift Capacity at Full Height273 kg (600 lb.)
at 450 mm (18 in.)385 kg (845 lb.)
at 900 mm (36 in.)335 kg (735 lb.)
Breakout (Boom)	4010 N (900 lb.)
Breakout (Bucket)	6660 N (1495 lb.)

CAPACITY—60 Loader, 670 Tractor

Lift Capacity at Full Height297 kg (655 lb.)
at 450 mm (18 in.)385 kg (845 lb.)
at 900 mm (36 in.)335 kg (735 lb.)
Breakout (Boom)	4010 N (900 lb.)
Breakout (Bucket)	6660 N (1495 lb.)

CAPACITY—70, Loader, 750 Tractor

Lift Capacity at Full Height318 kg (700 lb.)
at 450 mm (18 in.)540 kg (1190 lb.)
at 900 mm (36 in.)460 kg (1010 lb.)
at 1800 mm (72 in.)335 kg (735 lb.)
Breakout (Boom)	5790 N (1300 lb.)
Breakout (Bucket)	6995 N (1570 lb.)

CAPACITY—70, 70A Loader, 755, 770 and 855 Tractor

Lift Capacity at Full Height342 kg (755 lb.)
at 450 mm (18 in.)540 kg (1190 lb.)
at 900 mm (36 in.)460 kg (1010 lb.)
at 1800 mm (72 in.)335 kg (735 lb.)
Breakout (Boom)	5790 N (1300 lb.)
Breakout (Bucket)	6995 N (1570 lb.)

CAPACITY—70A Loader, 955 Tractor

Lift Capacity at Full Height422 kg (930 lb.)
at 450 mm (18 in.)659 kg (1450 lb.)
at 900 mm (36 in.)559 kg (1230 lb.)
at 1800 mm (72 in.)407 kg (895 lb.)
Breakout (Boom)	7060 N (1585 lb.)
Breakout (Bucket)	8530 N (1915 lb.)

(Two-Wheel Steer)**

M78226

Tractor Tire Size Specifications

Front	16x6050-8 4 PR	18x8.50-8 4 PR
Rear	23x10.50-12 2 PR	26x12.00-12 2 PR

Loader Dimensions

A—Maximum Lift Height (lowest point on bucket)	175 cm (69 in.)	178 cm (70 in.)
B—Maximum Clearance Under Fully Dumped Bucket	132 cm (52 in.)	135 cm (53 in.)
C—Reach With Fully Dumped Bucket 45°	65 cm (25.5 in.)	65 cm (25.5 in.)
D—Maximum Bucket Dump Angle	50°	50°
E—Reach With Bucket On Ground	109 cm (43 in.)	108 cm (42.5 in.)
F—Bucket Rollback Angle On Ground	19°	18°
G—Digging Depth Below Ground	10 cm (4 in.)	8 cm (3 in.)

Required Tractor Ballasting

- w/23 in. Tires Minimum of 295 kg (650 lb.) rear ballast, 113 kg (250 lb.) on rear wheels
- w/26 in. Tires Minimum of 340 kg (750 lb.) rear ballast, 113 kg (250 lb.) on rear wheels

Hydraulic System

- Pump, Reservoir, and Controls Tractor
- Rated Pressure 6890 kPa (1000 psi)
- Lift Cylinder Diameter 38 mm (1.5 in.)
- Bucket Cylinder Diameter 44 mm (1.75 in.)

DIMENSIONS—44 LOADER

M78226

Loader Dimensions	316, 318, & 330	420	430
A—Maximum Lift Height (lowest point on bucket)	1816 mm (71.5 in.)	1854 mm (73 in.)	1854 mm (73 in.)
B—Maximum Clearance (Fully Dumped Bucket)	1320 mm (52 in.)	1358 mm (53.5 in.)	1358 mm (53.5 in.)
C—Reach (Fully Dumped Bucket 45°)	533 mm (21 in.)	558 mm (22 in.)	558 mm (22 in.)
D—Maximum Bucket Dump Angle	50°	50°	50°
E—Reach With Bucket On Ground	1117 mm (44 in.)	1130 mm (44.5 in.)	1300 mm (51.25 in.)
F—Bucket Rollback Angle	20°	20°	20°
G—Digging Depth Below Ground	114 mm (4.5 in.)	100 mm (4 in.)	100 mm (4 in.)

NOTE: Operating dimensions vary with tractor size, and bucket used. Dimensions for the 44 Loader are given on the John Deere 318 Tractor with 6.50x16 front tires, 10.5x23 rear tires and a 1220 mm (48 in.) bucket. The John Deere 420 and 430 Tractors are equipped with 8.50x18 front tires, 12.00x26 rear tires and a 1220 mm (48 in.) bucket.

Required Tractor Ballasting

34 kg (75 lb.) of rear wheel weights (total), Maximum liquid in rear tires, & 77 kg (170 lb.) on rear wheels (min.)

Hydraulic System	316, 318 & 330	420 & 430
Pump, Reservoir, and Controls	Independent	Independent
Rated Pressure	6890 kPa (1000 psi)	8274 kPa (1200 psi)
Lift Cylinder Diameter	44 mm (1.75 in.)	44 mm (1.75 in.)
Bucket Cylinder Diameter	44 mm (1.75 in.)	44 mm (1.75 in.)
Lift Cylinder Stroke	44 mm (1.75 in.)	44 mm (1.75 in.)
Bucket Cylinder Stroke	466 mm (18.38 in.)	368 mm (14.5 in.)

DIMENSIONS—60, 70, 70A

CYCLE TIMES

NOTE: All times in seconds

	MODEL							
	60 Loader 655 Tractor	60 Loader 650 Tractor	60 Loader 670 tractor	70 Loader 755 Tractor	70A Loader 855 Tractor	70 Loader 750 Tractor	70 Loader 770 Tractor	70A Loader 955 Tractor
Loader raising time	4.3	4.8	2.2	3.2	3.2	3.9	2.7	2.8
Loader lowering time	2.7	5.4	2.0	2.0	2.0	5.5	2.6	2.4
Bucket dumping time	3.7	4.3	2.1	2.2	2.2	3.6	2.0	2.5
Bucket rollback time	3.6	1.7	1.7	2.2	2.2	1.5	2.0	2.1
Hydraulic flow	15 L/m 4.0 gpm	21.1 L/m 5.6 gpm	20.9 L/m 5.5 gpm	21.1 L/m 5.6gpm	21.1 L/m 5.6gpm	23.9 L/m 6.3 gpm	21.1 L/m 5.6 gpm	27.6 L/m 7.2 gpm

Cycle times are based on flow rates at S.C.V. and with power steering.
1220 mm (48 in.) bucket size used.

BUCKET STRUCK CAPACITY

48-Inch	0.17 mm ³ (6.2 cu-ft.)
54-Inch	0.19 mm ³ (7.0 cu-ft.)
60-Inch	0.22 mm ³ (7.8 cu-ft.)

INTERNAL VALVE LEAKAGE

(Maximum acceptable limit)

655, 670, 770, 755, 855, and 955	12ML/min (0.73 cu. in.)
--	-------------------------

LIFT CYLINDER DROP RATE

(Maximum acceptable limit from transport position)

60, 70, 70A	10.4 mm/min (.41 in./min)
-----------------------	---------------------------

BUCKET CYLINDER DROP RATE

(Maximum acceptable limit from rollback position)

60, 70, and 70A	13 mm/min (.51 in./min)
---------------------------	-------------------------

FITTINGS

SERVICE RECOMMENDATIONS FOR O-RING BOSS FITTINGS

STRAIGHT FITTING

1. Inspect O-ring boss seal for dirt or defects.
2. Lubricate O-rings with petroleum jelly. Place electrical tape over threads to protect O-ring. Slide O-ring over tape and into O-ring groove of fitting. Remove tape.
3. Tighten fitting to torque value shown on chart.

M82649A

ANGLE FITTING

1. Back-off lock nut (A) and back-up washer (B) completely to head-end (C) of fitting.
2. Turn fitting into threaded boss until back-up washer contacts face of boss.
3. Turn fitting head-end counterclockwise to proper index (maximum of one turn).
4. Hold fitting head-end with a wrench and tighten locknut and back-up washer to proper torque value.

M82650A

NOTE: Do not allow hoses to twist when tightening fittings.

TORQUE VALUE

Thread Size	N•m	lb-ft
3/8-24 UNF	8	6
7/16-20 UNF	12	9
1/2-20 UNF	16	12
9/16-18 UNF	24	18
3/4-16 UNF	46	34
7/8-14UNF	62	46
1-1/16-12 UN	102	75
1-3/16-12 UN	122	90
1-5/16-12 UN	142	105
1-5/8-12 UN	190	140
1-7/8-12 UN	217	160

NOTE: Torque tolerance is ± 10%
